Table 1

Descriptive Statistics and ANOVA Table

Statistics are presented in the order **Overall** / A / B / C (Overall shown in bold).

Variable	N (Overall)	N A	N B	N C	M (Overall)	M A	M B	M C	Median (Overall)	Median A	Median B	Median C	SD (Overall)	SD A	SD B	SD C	Skewness (Overall)	Skew A	Skew B	Skew C

Note. This table summarised the descriptive statistics for all variables used in this study. Statistics were presented in the order of **overall** /A/B/C relative to Norway's national COVID-19 lockdown. Group differences at intake for selected variables were presented in the one-way ANOVA table, with ν_1 and ν_2 representing the numerator- and denominator-degree of freedoms respectively.

† $p < .10$.
